## Inconsistent Data Elements Report

### Introduction

The Inconsistent Data Elements Report option generates a report of patients identified by the Consistency Checker as having inconsistent/unspecified data in their records for a selected date range. This report contains entries in the INCONSISTENT DATA file (#38.5).

The Consistency Checker must be turned ON at your site in order to run this report.

You may elect to run this report within a specified date range of either admission dates, identification dates (dates inconsistent/unspecified data were identified), or registration dates. It may be listed by terminal digit or patient name.

The listing will include the patient name, home phone #, social security number, date of identification, initials of person who last edited the file, and the number(s) corresponding to the inconsistent/unspecified data elements. A legend will be given at the bottom of the report showing what inconsistent/unspecified data item each number corresponds to.

### Example

Generate a listing of inconsistent data elements by:

```
ADMISSION DATE
IDENTIFICATION DATE
REGISTRATION DATE
```

CHOOSE OUTPUT METHOD OR ENTER '^' TO QUIT: IDENTIFICATION DATE

```
Start with IDENTIFICATION DATE: T-7 (JAN 08,1997)
Go to IDENTIFICATION DATE: JAN 08,1997// T (JAN 15,1997)
```

List by (N)ame or (T)erminal Digit: NAME

THIS OUTPUT REQUIRES 132 COLUMN OUTPUT

```
DEVICE: HOME// ADMS PRNT RIGHT MARGIN: 132// <RET>
DO YOU WANT YOUR OUTPUT QUEUED? NO// Y (YES)
```

Requested Start Time: NOW// <RET> (JAN 15,1997@07:23)

Request Queued!

## Waiting List Output

### Introduction

The Waiting List Output option is used to generate a listing of those patients entered through the Waiting List Entry/Edit option who are currently awaiting future admission. The only prompts are for device selection.

The report will include the patient's name, priority group number, bedsection the patient is applying to, treating specialty, date/time of application, and whether or not the patient is service connected. At multidivisional facilities, the report will be separated by division.

### Example

PATIENT	BEDSECTION APPLYING TO	TREATING SPECIALTY	SEP 25,1990 12:06 DATE/TIME OF APPLICATION	PAGE 1 SC
---------	---------------------------	-----------------------	--	--------------

DIVISION: BROCKTON				
	PRIORITY GROUP # 1

## Enrollment Reports

### Enrolled Veterans Report

#### Introduction

This option is used to produce the Enrolled Veterans Report. The report contains a summary of the number of patients in each enrollment priority group and includes the enrollment category (Enrolled, Not Enrolled, and In Process)

The only prompt is for device.

For information about how a veteran's priority is derived, please refer to the Enrollment Priority Algorithm Appendix of this manual.

#### Example

##### Enrolled Veterans Report May 19, 1999

##### CURRENTLY ENROLLED VETERANS AND VETERANS WITH PENDING APPLICATIONS

		Enrolled	Not Enrolled	In Process
NO Priority Group:	56		28	28

Not Eligible Status:		8		
Rejected: Initial Application By VAMC Status:		2		
=====				
Total:		149		

## Enrollment Reports

### Pending Applications for Enrollment

#### Introduction

The Pending Applications for Enrollment option is used to generate a list of patients with enrollment statuses of *Unverified* and *Pending* for selected facilities within a specified date range. The report is sorted by preferred facility and enrollment status. Patients are listed chronologically by appointment date.

You are prompted to select a date range, the facilities you want to include in the report, and a device. If you print the report to include ALL facilities, the report will include only selected institutions as determined by the patients' chosen preferred facility.

#### Example

Pending Applications For Enrollment - Enrollment Category is "In Process"  
Date Range: Jan 01, 1998 to Nov 19, 1998 Run Date: Nov 19, 1998

## **Enrollment Reports**

### **Enrollees by Status, Priority, Preferred Facility**

#### **Introduction**

The Enrollees by Status, Priority, Preferred Facility option is used to produce a report that provides counts of patients by preferred facility, enrollment status, and enrollment priority.

The report is divided into two parts, Summary Statistics and Patient Listing. The Patient Listing portion of the report will only be printed if you choose to include the list of selected patients. You may select one/many/all enrollment statuses and enrollment priorities if you include the list of patients. Otherwise all applicable statuses and priorities will be included in the report.

If you choose to include the list of patients, the following patient-specific information will be displayed.

- name
- SSN
- date of birth
- enrollment status
- enrollment priority
- enrollment date
- end date
- enrollment category

## Enrollment Reports

### Upcoming Appointments without Enrollment

#### Introduction

The Upcoming Appointments without Enrollment option is used to generate a report of patients with future appointments who are not enrolled and do not have pending enrollment applications.

You are prompted to enter a date range in the future. You can sort by all clinics, all clinics in a particular division(s), or individual clinics. For patients with multiple appointments, you may choose to list only the first appointment or to list all appointments.

#### Example

Appointments for Veterans with no Enrollment Application				Date Range: Apr 02, 1999 to Aug 31, 1999		Page 1

## **Enrollment Reports**

### **EGT Impact Report**

#### **Introduction**

After the EGT change is received at the medical center and the MailMan bulletin has been sent to notify staff of the changes, a process is needed to allow the staff to determine which specific veterans may be affected by the EGT change. Four separate reports which may be generated through this option provide this information.

Sort criteria includes *preliminary* reports or *actual* reports.

- If preliminary is selected, the output is calculated based on a comparison of the EGT setting and the veteran's enrollment priorities as recorded in VISTA.
- If actual is selected, the output is calculated based on a comparison of the EGT setting and the veteran's enrollment priorities as provided by HEC and recorded in VISTA.

Sort criteria includes *summary* reports or *detail* reports.

- If summary is selected, the output provides a count, by enrollment priority, of those patients potentially affected (preliminary) or actually affected (actual) by the EGT change.
- If detailed is selected, the output provides patient specific information and enrollment information. The selection of actual or preliminary is a key factor in this output. The user may choose to include future appointments in the detailed reports.

*EGT Preliminary Summary Impact Report* - This report provides a preliminary, summarized count of patients who are potentially affected by the EGT change.

*EGT Preliminary Detailed Impact Report* - This report provides a preliminary, detailed count of patients who are potentially affected by the EGT change and includes patient information and enrollment information.

## Enrollment Reports

### EGT Impact Report

#### Introduction

*EGT Actual Summary Impact Report* - This report provides a count of patients who are actually affected by the EGT change.

*EGT Actual Detailed Impact Report* - This report provides a detailed count of patients who are actually affected by the EGT change and includes patient information and enrollment information.

#### Example

Below is an example of the EGT Preliminary Summary Impact Report.

```

          EGT Preliminary Summary Impact Report
      Date/Time Report Run:  JUL 10, 1999 @ 0800
EGT Setting: 6      EGT Type: Fiscal Year      EGT Effective Date: OCT 01, 1999
      Date/Time Last EGT Setting: JUL 01, 1999 @ 0800

```

#### IMPORTANT NOTE:

Preliminary report is based on a comparison of the EGT setting to the veterans current enrollment priority as shown in VISTA.

ENROLLMENT PRIORITY	TOTAL (UNIQUE SSN)	# INPATIENT	# OUTPATIENT
7A	54	10	44
7B	46	3	43

TOTAL PATIENTS (UNIQUE SSNS) FOR THIS FACILITY:            100

## **Disposition an Application**

### **Introduction**

Depending on the type of disposition selected, other PIMS functionality may be accessed (i.e., Make Appointment). Please refer to the appropriate option documentation, if necessary.

The eligibility code and period of service are now required before a registration can be dispositioned. These elements were previously checked for at registration.

Registrations (10-10 and unscheduled) must be checked out to complete the disposition. When the system attempts checkout, the appropriate service-connection and exposure questions for the selected patient are asked. Depending on how the disposition parameters are set in the Scheduling Parameters option and whether or not the checkout is complete, you may also be prompted through a checkout interview. Providers, diagnoses, procedure codes, and stop codes may be added, edited, or deleted for the selected application. Depending on how site parameters are set, these fields may be required to complete the checkout.

You also have the option to display the Check Out screen. The Check Out screen is displayed showing classification, provider, diagnosis, and associated stop code information with a list of actions for selection. Many of these actions automatically access other PIMS or Record Tracking functionality. Please refer to the appropriate option documentation, if necessary. Actions that appear in parentheses on this screen are not available through this option. Double question marks (??) may be entered to display additional screen actions. For assistance in using this screen, you may enter (??) at the "Select Action" prompt.

The validation logic performs the same validation checks as the Austin database to identify errors before they are transmitted. The validator (or edit checker) will review the entire encounter rather than stopping after the first error is found. You may be given the opportunity to correct these errors through this option.

The Veterans Healthcare Eligibility Reform Act of 1996, PL 104-262, prohibits providing care for veterans who are not enrolled after October 1, 1998 (with limited exceptions). The Disposition an Application option displays enrollment information and provides the ability to enroll the patient in the VA Patient Enrollment System.

## Disposition an Application

### Introduction

A preliminary priority value is calculated on an initial enrollment application. If the preliminary priority is below the latest EGT setting, a preliminary Enrollment Category of "Not Enrolled" and a preliminary Enrollment Status of "Rejected - Initial Application by VAMC" shall be assigned. If the preliminary priority cannot be calculated or is calculated above the latest EGT setting, a preliminary Enrollment Category of "In Process" and a preliminary Enrollment Status of "Unverified" shall be assigned.

At verification, the HEC will recalculate these fields based on a Master Veteran Record containing all nationally available patient data.

### Example

## **10-10T Registration**

### **Introduction**

This option collects data for the VA Form 10-10T - Application for Medical Benefits. The 10-10T was designed to collect the minimum amount of patient information required to process a patient for medical care. The objective was to decrease the amount of time involved with the initial application for care. Use of the 10-10T as the default form for initial medical care applications and for mail-in applications has been mandated in VHA Directive 10-95-072.

If you select a patient who has been previously registered or for whom data has been entered previously through this option, the information on file will be displayed via a series of List Manager screens. You may select "interview" at any screen to edit all the data elements.

If you register the patient while utilizing this option, you may also be able to print the following forms: the Supplemental Data Sheet, the Patient Drug Profile, the 10/10, the 10/10I, the 10-10F, the Third Party Review Sheet, and Encounter Forms. Specific printers may be designated to automatically print most of these forms through the MAS Parameter Entry/Exit option. A YES entry at the "Ask Device in Registration" parameter will force the DEVICE prompt at the beginning of registration the first time through and set the 10/10, routing sheet, and drug profile printer to that device. This takes precedence over all devices defined as default printers or closest printer. If you do not register the patient, you will only be able to print the 10-10T form.

The Supplemental Data Sheet contains some of the same information found on the 10/10 (social security number, next of kin) along with clinic information including clinic enrollment and future appointments. This form will automatically be printed along with the 10/10 form if the MAS parameter "Supplemental 10/10" is set to YES.

The Patient Drug Profile lists the patient's prescriptions that are on file and any pending outpatient clinic appointments. You may choose to print an action or informational type drug profile. Whether or not the drug profile prompts appear in this option will depend on how the MAS parameter "Print Drug Profiles with 10-10" is set at your facility.

The 10/10 - Application for Medical Benefits is the basic form used to obtain all necessary information about a patient requesting medical care.

## **10-10T Registration**

### **Introduction**

The 10/10F - Financial Worksheet provides financial information on the veteran for Means Test tracking purposes. It shows all assets including salaries, interest and dividends, stocks, bonds, real estate holdings, etc. The prompt to print this form will only appear if the patient has a completed Means Test.

The 10/10I - Insurance Information Form contains information concerning the veteran's private health insurance. The name, address, and telephone number of the patient's local insurance agent is provided. This information will be provided for each different health insurance the veteran has. The prompt to print this form will only appear if the patient has private medical insurance.

The Third Party Review Sheet is used in connection with veterans admitted to the hospital who have private medical insurance. The insurance data is not displayed on the form if the insurance has expired. The prompt to print this form will only appear if the patient has private medical insurance and past or scheduled admissions.

Whether or not the health summary prompts appear in this option will depend on your site running the Health Summary package V. 2.5 (Patch #3 or higher) and how the MAS health summary site specific parameters are set.

Whether or not the encounter form prompts appear in this option will depend on how the MAS encounter form site parameters are set at your facility.

You also have the ability to print patient data cards through this option. The "Ask EMBOSS at Registration" site parameter must be set to YES in order for the data card prompts to appear here. With the installation of the Veteran Identification Card (VIC) software, the prompt "Download VIC data?" appears which allows you to download the selected patient's demographic data to the photo capture station.

At multidivisional facilities, the primary facility will be listed on the forms.

## **10-10T Registration**

### **Introduction**

At the beginning of the registration process, “Enrollment/Eligibility Query sent ...” displays on your screen to notify you that the software sent an enrollment query for the selected patient to the patient database at the Health Eligibility Center (HEC).

The Veterans Healthcare Eligibility Reform Act of 1996, PL 104-262, prohibits providing care for veterans who are not enrolled after October 1, 1998 (with limited exceptions). The 10-10T Registration option displays enrollment information and provides the ability to enroll the patient in the VA Patient Enrollment System.

A preliminary priority value is calculated on an initial enrollment application. If the preliminary priority is below the latest EGT setting, a preliminary Enrollment Category of “Not Enrolled” and a preliminary Enrollment Status of “Rejected - Initial Application by VAMC” shall be assigned. If the preliminary priority cannot be calculated or is calculated above the latest EGT setting, a preliminary Enrollment Category of “In Process” and a preliminary Enrollment Status of “Unverified” shall be assigned. At verification, the HEC will recalculate these fields based on a Master Veteran Record containing all nationally available patient data.

PRIMARY ELIGIBILITY CODE: SC LESS THAN 50%// **NSC**           5           5   VETERAN  
MEANS TEST REQUIRED  
Select ELIGIBILITY: NSC// **<RET>**  
    ELIGIBILITY: NSC// **<RET>**  
PERIOD OF SERVICE: VIETNAM ERA// **<RET>**

#### ---Marital---

MARRIED LAST CALENDAR YEAR: YES// **<RET>**   YES

#### ---Spouse---

SPOUSE'S NAME: **SMALLEY,PATTY**  
SPOUSE'S SEX: FEMALE// **<RET>** FEMALE  
SPOUSE'S DATE OF BIRTH: **073033** (JUL 30, 1933) (JUL 30, 1933)  
SPOUSE'S SSN: **010-01-1010**  
EFFECTIVE DATE: (7/30/33 - 12/31/96): **021458** (FEB 14, 1958)

#### ---Income---

LAST YEAR'S ESTIMATED "HOUSEHOLD" TAXABLE INCOME: **45000**

#### ---Insurance---

COVERED BY HEALTH INSURANCE?: NO// **Y** YES  
Select INSURANCE COMPANY: **ABC**           10 SOUTH STREET           TROY           NEW YORK           N

Each Insurance policy entry for a patient must be associated with an Insurance Plan offered by the Insurance company you just selected. You will be given a choice of selecting previously entered Group Plans or you may enter a new one. If you enter a new Insurance Plan you must enter whether or not this is a group or individual plan.

This company offers active group plans. Do you wish to select one? **YES**  
Do you wish to directly enter this plan? YES// **<RET>**  
Select an Active GROUP PLAN: **A1B2C3**   ABC           Name: SIMPLE                           Number: A1B2C3

Now you may enter the patient specific policy information. Most of these fields will be familiar to experienced users. The field 'SUBSCRIBER ID' used to be called 'INSURANCE NUMBER' and has been modified to allow entering just 'SS' to retrieve the patients SSN. This field is the identifier for the policy or patient that the carrier uses. See the new help.

INSURANCE TYPE: ABC// **<RET>**  
EFFECTIVE DATE OF POLICY: **110150** (NOV 01, 1950)  
INSURANCE EXPIRATION DATE: **<RET>**  
WHOSE INSURANCE: **V** VETERAN  
SUBSCRIBER ID: **SS** 234561222  
INSURED'S DOB: **050226** (MAY 02, 1926)  
SOURCE OF INFORMATION: INTERVIEW// **<RET>**

You can now edit information specific to the PLAN. Remember, updating PLAN information will affect all patients with this plan, if it is a group plan, and not just the current patient.

## Section 8 - Registration Menu

### 10-10T Registration

#### Example

DRIVER, ROGER 012 -03-4056

Consent To Release Information: I hereby authorize the Department of Veterans Affairs to disclose any such history, diagnostic and treatment information from my medical records (including information relating to the diagnosis, treatment or other therapy for the conditions of drug abuse, alcoholism or alcohol abuse, sickle cell anemia, or testing for or infection with the human immunodeficiency virus) to the carrier or contractor of any health plan contract under which I am apparently entitled to medical care or payment of the expense of care that is identified above, as considered necessary by VA representatives for the discharge of the legal or contractual obligations of the insurer or other party against whom liability is asserted. I understand that I may revoke this authorization at any time, except to the extent that action has already been taken in reliance on it. Without my express revocation, this consent will automatically expire when all action arising from VA's claim for reimbursement for my medical care has been completed.

Co-payment Notice: If your household income exceeds the established threshold, you will be considered "Discretionary". Such veterans must pay a co-payment not to exceed the Medicare deductible, plus a per diem for hospital and nursing care. By signing this application, you are agreeing to pay the VA the applicable co-payment if you are determined to be a "discretionary" veteran.

Signature of Applicant

Date

Public reporting burden for this collection of information is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspects of this collection, including suggestions for reducing this burden to VA Clearance Officer (045A4), 810 Vermont Avenue, NW, Washington, DC 20420.

PRIVACY ACT NOTICE: The information requested on this form is solicited under authority of Title 38, U.S.C., Sections 710, 1712 and 1722. It is being collected to enable us to determine your eligibility for medical benefits, identify your medical records, and provide basic data for your treatment. Additional information, such as medical history, may be solicited during the course of your medical evaluation or treatment. The income and eligibility information you supply may be verified through a computer matching program at any time and information may be disclosed outside VA as permitted by law; possible disclosures include those described in the "routine uses" identified in the VA system of records 24VA136, Patient Medical Records -VA, published in the Federal Register in accordance with the Privacy Act of 1974. These "routine uses" include disclosures: in response to court subpoenas; to epidemiological and other research facilities for research purposes; in connection with collections of amounts owed to the United States; to the Department of Justice for use in litigation; to other Federal agencies in connection with their employment determinations, investigations, or issuance of licenses or benefits; to report apparent law violations to other Federal, State or local agencies charged with law enforcement responsibilities; in response to an official request from a criminal or civil law enforcement governmental agency charged with the protection of public health or safety; to the Internal Revenue Service to verify unearned income, collect amounts owed VA, and to report as income debts that are waived, compromised or otherwise forgiven; to the Social Security Administration to verify earned income and employment data; to notify State licensing boards and Federal agencies of the health care practices of health care providers; to non-VA health care providers; to non-VA health care providers of facilities when the patient is referred for medical care at VA expense; to private sector organizations for the purpose of obtaining accreditation or approval rating for the health care facility; to non-VA nursing homes for preadmission screening; or, to contractors to perform the services covered by the contract. Disclosure is voluntary, however, failure to furnish the information will result in our inability to process your request and serve your medical needs. Failure to furnish the information will have no adverse effect on any other benefits to which you may be entitled. Disclosure of the Social Security number(s) of those for whom benefits are claimed is requested under the authority of Title 38, U.S.C., and is voluntary. Social Security numbers will be used in the administration of veteran's benefits, in the identification of veterans or persons claiming or receiving VA benefits and their records and may be used for other purposes where authorized by both Title 38, U.S.C., and the Privacy Act of 1974 (5 U.S.C. 552a) or where required by another statute.

## Collateral Patient Register

### Introduction

This option is used to enter a collateral patient into your system. A collateral patient is a non-veteran patient whose appointment is related to or associated with a veteran's treatment. The patient selected must have an eligibility code of COLLATERAL OF VET and a period of service of OTHER NON-VETERAN.

You may enter new patients as collaterals or designate patients already in your database as collaterals. If you enter a patient already in your database, the system checks data in the patient's file to determine if he/she meets the conditions which qualify him/her as a collateral patient. If the requirements are not met, a message is displayed on your screen and you will not be permitted to proceed.

You may also use this option to edit information pertaining to a collateral patient. In these cases, the existing information will be shown as defaults.

### Example

```
Select PATIENT NAME: MARSH,STEVEN
  ARE YOU ADDING 'MARSH,STEVEN' AS A NEW PATIENT (THE 1267TH)? Y   (YES)

## **Register a Patient**

### **Introduction**

At the beginning of the registration process, “Enrollment/Eligibility Query sent ...” displays on your screen to notify you that the software sent an enrollment query for the selected patient to the patient database at the Health Eligibility Center (HEC). If the enrollment information for the selected patient is not returned by the end of the registration process, you can enroll the patient via the Patient Enrollment option.

The Veterans Healthcare Eligibility Reform Act of 1996, PL 104-262, prohibits providing care for veterans who are not enrolled after October 1, 1998 (with limited exceptions). The Register a Patient option displays enrollment information and provides the ability to enroll the patient in the VA Patient Enrollment System.

A preliminary priority value is calculated on an initial enrollment application. If the preliminary priority is below the latest EGT setting, a preliminary Enrollment Category of “Not Enrolled” and a preliminary Enrollment Status of “Rejected - Initial Application by VAMC” shall be assigned. If the preliminary priority cannot be calculated or is calculated above the latest EGT setting, a preliminary Enrollment Category of “In Process” and a preliminary Enrollment Status of “Unverified” shall be assigned. At verification, the HEC will recalculate these fields based on a Master Veteran Record containing all nationally available patient data.

## Patient Enrollment

### Introduction

This option permits those patients that are eligible for care to be enrolled. It is also used to expand an enrollment history record and update a patient's preferred facility. The screens which may be displayed while utilizing this option are *Enrollment*, *Priority Factors*, and *Enrollment History*. Note that actions that appear on the screens enclosed in parentheses ( ) are not available for selection.

A preliminary priority value is calculated on an initial enrollment application. If the preliminary priority is below the latest EGT setting, a preliminary Enrollment Category of "Not Enrolled" and a preliminary Enrollment Status of "Rejected - Initial Application by VAMC" shall be assigned. If the preliminary priority cannot be calculated or is calculated above the latest EGT setting, a preliminary Enrollment Category of "In Process" and a preliminary Enrollment Status of "Unverified" shall be assigned. At verification, the HEC will recalculate these fields based on a Master Veteran Record containing all nationally available patient data.

The CE Cease Enrollment functionality in this option has been disabled. Veterans will now sign a form declaring their wish to cancel/decline which will then be faxed to the HEC for processing.

The following is a description of the actions available through this option.

Short Name	Full Name	Description
EP	Enroll Patient	Lets you enroll patients that are eligible for care but not previously enrolled.
PF	Preferred Facility	Lets you edit the treatment facility preferred by the patient.
EH	Expand History	Lets you scroll through the enrollment history screens. This action is only available if the selected patient is already enrolled.
SQ	Send Query	Lets you transmit an enrollment query. The software asks if you want to be notified when the query returns. The notification information is then displayed on the status bar.
CD	Catastrophic Disability	Works the same as the Add/Edit/Delete Catastrophic Disability menu option.
SP	Select Patient	Lets you select another patient without leaving the Patient Enrollment option.
AU	View Upload Audit	Displays fields in the PATIENT file (#2) that are changed when a transaction is uploaded from the HEC.

## Patient Enrollment

### Introduction

Short Name	Full Name	Description																																								
QS	Check Query Status	<p>Lets you check the status of an outstanding enrollment/eligibility query. The status bar displays the status of the last enrollment/eligibility query sent for the selected patient. If HEC has an enrollment record for the patient being enrolled, the reply will contain the patient's enrollment record. If HEC has eligibility data on file, that data will also be included in the query reply. The data will be automatically uploaded for all fields in the PATIENT ENROLLMENT file (#27.11) and to the following fields in the PATIENT file (#2) (unless a problem is detected).</p> <table><tr><td>Eligibility Status Date</td><td>Primary Eligibility Code</td></tr><tr><td>Eligibility Status</td><td>**Patient Eligibilities</td></tr><tr><td>Eligibility Verif. ## Appendix A - The Enrollment Query Process

As part of the enrollment functionality provided by Patch DG\*5.3\*147, sites are able to query the Health and Eligibility Center (HEC) (formerly known as the IVM Center) for patient eligibility and enrollment information. The queries are generated automatically when you register a patient using either of the following options:

- Register a Patient
- 10-10T Registration

You can also send a query for patient enrollment and eligibility data by using the new Send Query action of the Patient Enrollment option. When using the Patient Enrollment option to query HEC, you can choose whether or not you should be notified via a MailMan message when the reply is received. The status bar will display the status of the last enrollment/eligibility query sent for the specified patient, (whether or not a reply was received), and, if received, whether or not the reply resulted in patient data being uploaded to the local database. Use the Check Query Status action to check the status of an outstanding query.

Patch DG\*5.3\*147 established a new mail group, DGEN ELIGIBILITY ALERT, which is used when uploading eligibility data to notify the site of certain changes. HEC may also use the mail group to communicate with the site regarding patient eligibility. Local users who are responsible for maintaining patient eligibility information should be entered as members of this mail group.

There is no guarantee that you will receive the query reply immediately, but, in most cases, the reply should be received very quickly. You are allowed to proceed with your business without waiting for the reply. Within the Register a Patient option, the software checks every time you navigate between screens. If the reply has been received, and is currently being processed, you will be notified that "Upload of patient enrollment/eligibility data is in progress ..." and you will experience a short pause. The 10-10T software handles the receipt of the query reply similarly.

If HEC has an enrollment record for the patient being enrolled, the reply will contain that patient's enrollment record. If HEC has eligibility data on file, that data will also be included in the query reply. The data will be automatically uploaded to the PATIENT file (#2) and the PATIENT ENROLLMENT file (#27.11), unless a problem is detected. All the fields in the PATIENT ENROLLMENT file (#27.11) will be uploaded as a result of the query reply.

The following fields in the PATIENT file (#2) will be uploaded as a result of the query reply.

- ELIGIBILITY STATUS DATE
- ELIGIBILITY STATUS
- ELIGIBILITY VERIF. METHOD
- CLAIM NUMBER
- \*CLAIM FOLDER LOCATION
- POW STATUS INDICATED?
- SC AWARD DATE
- TOTAL ANNUAL VA CHECK AMOUNT
- VETERAN Y/N?
- SERVICE CONNECTED?
- SERVICE CONNECTED PERCENTAGE
- RECEIVING A VA PENSION?
- RECEIVING A&A BENEFITS?
- RECEIVING HOUSEBOUND BENEFITS?
- RECEIVING VA DISABILITY?
- DISABILITY RETIREMENT FROM MIL.
- AGENT ORANGE EXPOS. INDICATED?
- RADIATION EXPOSURE INDICATED?
- ENVIRONMENTAL CONTAMINANTS?
- PRIMARY ELIGIBILITY CODE
- PATIENT ELIGIBILITIES ← *Uploaded data will replace the data currently in the file.*
- P&T
- UNEMPLOYABLE
- RATED INCOMPETENT?
- INELIGIBLE DATE
- INELIGIBLE REASON
- INELIGIBLE VARO DECISION
- ELIGIBLE FOR MEDICAID?
- PREFERRED FACILITY
- RATED DISABILITIES (VA) MULTIPLE, FIELD .3721, MULTIPLE 2.04
  - RATED DISABILITIES (VA) ← *Uploaded data will replace the data currently in the file.*
  - DISABILITY %
  - SERVICE CONNECTED
- CATASTROPHIC DISABILITY:
  - REVIEW DATE
  - DECIDED BY
  - FACILITY MAKING DETERMINATION
  - DATE OF DECISION

HEC also has the capability of sending unsolicited updates of enrollment and eligibility data to local sites. An example of when HEC will use this capability is as follows: a veteran visits multiple facilities and reports a change to one of them. The other facilities will be automatically updated via an unsolicited update from HEC, which will contain the same data as the enrollment/eligibility query response.

## Appendix B - Enrollment Priority Algorithm

This section describes the algorithm used to derive a patient's enrollment priority. The following is the General Counsel's interpretation of the law and the data elements associated with deriving each priority group in **VistA**. The priority algorithm uses the value of the data elements at the time the priority is derived. The value of the data elements used are then stored with the enrollment record. All groupings apply to patients who are veterans that are eligible for care.

Note that if the Means Test Status for a veteran is Required **or** a Means Test does not exist for a veteran who is 0% SC and is required to have a Means Test, Priority Group 7 will not be determined until the Means Test is completed.

### **Stratification (4 sub categories) for Enrollment Group 7**

- Noncompensable 0% service-connected veterans enrolled prior to the EGT Effective Date published in the Federal Register.
- Noncompensable 0% service-connected veterans enrolled after a specified date as reflected in the Federal Register.
- All Priority 7 veterans (who are **not** service connected) enrolled prior to a specified date as reflected in the Federal Register.
- All other Priority 7 veterans.

## **Business Rules for Priority 7s**

- Priority 7B category shall be calculated only when the Secretary of the VA has made the decision to stop enrolling new applicants whom otherwise would classify as Priority 7A.
- Priority 7D category shall be calculated only when the Secretary of the VA has made the decision to stop enrolling new applicants whom otherwise would classify as Priority 7C.
- The stratification between 7A/B and 7C/D only takes place when the current EGT has an EGT Type equal to *STOP NEW ENROLLMENTS DURING CYCLE*. (In other words, there would not be a 7B or 7D when the most recently entered EGT has an EGT Type equal to *ANNUAL FY* or *MID CYCLE CHANGE*.)
- The stratification between 7A and 7B only takes place when the current EGT is for Priority 7A. (In other words, there would not be a Priority 7B unless the current EGT Effective Date specifies a cutoff of 7A and the EGT type equals *STOP NEW ENROLLMENTS DURING CYCLE*.)
- The stratification between 7C and 7D only takes place when the current EGT is for Priority 7C. (In other words, there would not be a Priority 7D unless the current EGT Effective Date specifies a cutoff of 7C and the EGT type equals *STOP NEW ENROLLMENTS DURING CYCLE*.)
- Any veteran evaluated as 7B or 7D will always be rejected. For example, if the previous EGT specified *STOP NEW ENROLLMENTS DURING CYCLE* and the cutoff is 7A, and this is changed to *STOP NEW ENROLLMENTS DURING CYCLE* for 7C, then all veterans who were previously 7B/rejected will now be evaluated as 7A/enrolled.

<b>Priority Group #</b>	<b>Veterans Included</b>	<b>How They Qualify</b>
1	Veterans with service-connected disabilities rated 50% or greater	[Service-Connected is Yes AND Service-Connected Percentage between 50 and 100%] OR [Eligibility Code of SERVICE CONNECTED 50% TO 100%]
2	Veterans with service-connected disabilities rated 30% or 40%	[Service Connected is Yes AND Service Connected Percentage between 30 and 49% AND Eligibility Code of SC LESS THAN 50%]
3	<ul style="list-style-type: none"> <li>Former prisoners of war</li> <li>Veterans with service-connected disabilities rated 10% or 20%</li> <li>Veterans discharged or released from active military service for a compensable disability that was incurred or aggravated in the line of duty</li> <li>Veterans who are in receipt of Section 1151 benefits</li> </ul>	[POW Status Indicated is Yes] OR [Eligibility Code of POW] OR [Service Connected is Yes AND Service Connected Percentage between 10 and 29% AND Eligibility Code of SC LESS THAN 50%] OR [Disability Ret. From Military is 2 for Yes, Receiving Military Retirement in Lieu of VA Compensation]
4	<ul style="list-style-type: none"> <li>Veterans who are in receipt of increased pension based on a need of regular aid and attendance or by reason being permanently housebound</li> <li>Other veterans who are catastrophically disabled</li> </ul>	[Receiving A&A Benefits is Yes] OR [Eligibility Code of AID & ATTENDANCE] OR [Receiving Housebound Benefits is Yes] OR [Eligibility Code of HOUSEBOUND] OR [Catastrophically Disabled is Yes]

# Appendix B - Enrollment Priority Algorithm

Priority Group #	Veterans Included	How They Qualify
5	Veterans who have annual income and net worth below the Means Test threshold	[Means Test Category A] OR [Eligible for Medicaid is Yes] OR [Receiving a VA Pension is Yes] OR [Eligibility Code of NSC, VA PENSION]
6	All other eligible veterans who are not required to pay a copayment for their care	[Eligibility Code of WORLD WAR I] OR [Eligibility Code of MEXICAN BORDER WAR] OR [Agent Orange Expos. Indicated is Yes] OR [Radiation Exposure Indicated is Yes] OR [Environmental Contaminants is Yes] OR [Total Annual VA Check Amount is greater than 0]
7	Veterans who must pay a copayment for their care	[Means Test Category C] OR [Means Test is Pending Adjudication]
7A		[Service Connected is Yes AND Service Connected Percentage is 0 AND Total VA Check Amount is 0 or null AND Eligibility Code SC LESS THAN 50% AND Enrollment Date is <i>prior</i> to EGT Effective Date]
7B		[Service Connected is Yes AND Service Connected Percentage is 0 AND Total VA Check Amount is 0 or null AND Eligibility Code of SC LESS THAN 50% AND Enrollment Date is <i>after</i> EGT Effective Date]
7C		[Means Test is Category C] OR [Means Test is Pending Adjudication AND Enrollment Date is <i>prior</i> to EGT Effective Date]
7D		[Means Test is Category C] OR [Means Test is Pending Adjudication AND Enrollment Date is <i>after</i> EGT Effective Date]

## Inconsistency Supervisor Menu

### Determine Inconsistencies to Check/Don't Check

#### Introduction

This option allows you to choose what data items should be checked for inconsistencies at your site when running the Consistency Checker. Once a data item is selected, a message will be displayed telling you under what conditions that data item will be considered inconsistent.

Below is a numerical listing of each of the data items which you may select to have checked by the Consistency Checker. A single asterisk (\*) indicates the data element is set to ON by the PIMS software and cannot be edited. A double asterisk (\*\*) indicates the data element is set to OFF by the PIMS software and cannot be edited.

- 1 NAME FORMAT UNACCEPTABLE
- \*\*2 ALIAS FORMAT INCONSISTENT

59 CATASTROPHIC DISAB. INCOMPLETE  
99 CAN'T PROCESS FURTHER

#### **Example**

Select INCONSISTENT DATA ELEMENTS NAME : CATASTROPHIC DISAB. INCOMPLETE  
=====

Inconsistency results if the CATASTROPHICALLY DISABLED eligibility code is  
entered for the patient without the supporting catastrophic disability  
determination, or visa versa.  
=====

CHECK/DON'T CHECK: CHECK// <RET>

# Index

Following is an alphabetical listing of each menu and option documented in the ADT module of the PIMS User Manual.

099 Transmission .....	7-278
